

Summit is a SeaPort Next Generation (SeaPort NxG) prime contract holder. This contract provides Summit the ability to provide services in two functional area categories: engineering support services and program management support services; which are further divided into 23 functional areas.

Engineering Support Services

This functional area consists of supporting the application of engineering disciplines to technically support the research and development of new and existing Naval capabilities and systems, technically support development of significant alterations to existing systems, support integration and interface of existing equipment or software into different applications or platforms to support the warfighter, and support evaluation of foreign or non-developmental systems, equipment, and technologies.

- Engineering, System Engineering, and Safety and Process Engineering Support
- Software Engineering, Development, Programming, and Network Support
- In-Service Engineering, Fleet Introduction, Installation and Checkout and Provisioning Support
- Measurement Facilities, Range, and Instrumentation Support
- Interoperability, Test and Evaluation, Trials Support
- Research and Development Support
- Modeling, Simulation, Stimulation, and Analysis Support
- Prototyping, Pre-Production, Model-Making, and Fabrication Support
- System Design Documentation and Technical Data Support
- Reliability, Maintainability, and Availability (OmRM&A) Support
- Inactivation and Disposal Support
- Biochemical Engineering Support

Program Management Support Services

This functional area consists of applying the business, financial management, and technical disciplines required to support planning, organizing, staffing, controlling, and leading team efforts in managing acquisition programs such that the result places a capable and supportable system in the hands of the warfighter when and where it is needed. This category also consists of providing information system software analysis; requirements definition, design, development, test, modification, installation, implementation, quality assurance, training, and documentation; analyzing existing IT and IS databases, web sites, and IT applications and recommending new or improved interfaces and improved management tools that meet new requirements, or improve management effectiveness and efficiency.

- Financial Analysis and Budget Support
- Quality Assurance (QA) Support
- Functional and Direct Programmatic Administrative Support
- Professional Development and Training Support
- Analytical and Organizational Assessment Support
- Database Administrators
- Public Affairs and Multimedia Support
- Logistics Support
- Configuration Management (CM) Support
- Information System (IS) Development, Information Assurance (IA), and (IT) Support
- Computer Systems Analysts
